FINANCIAL AND COMMERCIAL.

MONEY MARKET.

SUNDAY, Jan. 28-6 P. M.
The week just closed has not d-veloped asything
tes in financial affairs. The strong exhibit made by the banks on Monday last gave great encourage-ment to holders and speculators in facey stocks, and the market became quite active and buoyant Later in the week advices of a more pacific character were received from Europe, and as the probabilities of peace strengthened, a firmer tone was in-parted to the stock exchange, and the excitement unts from California, with a million and a qua:counts from California, with a million and a quatter of gold, helped along the upward movement in prices. The hears, for a time, looked rather hise, and many bought in, under the impression that the market would run up beyond their reach. The apprehension was merely temporary. A few hours reflection destroyed a large portion of the heaf in the establishment of peaceful relations between the beliggerents in the Crimes, and the markets became more quiet. Later in the week tween the belligerents in the Crimea, and the markets became more quiet. Later in the week is was announced that shipments of specie to some extent would be made by the Southampton steamer, and that exchange wou'd run rapidly up to specie shipping points. For a time the effect of these rumors was rather unfavorable but the departure of the Baltic with only seventy. two thousand dollars in coin allayed the fears of ncy stock speculators, and the market resumed its buoyancy. On Friday it was reported that the Her-mann would take out about a quarter of a miliion in oin, but it appears she carried out only twenty-two com, but it appears she carried out only twenty-two
thousand dollars. All these things are in favor of
speculators in stocks for a rise, but prices have not
advanced so much as even the bears anticipated.
The slight inflations have not been sustained, and
there has not been so much firmness on the part of
holders as circumstances warranted. For several
weaks we have had good news from every part of
the world. Rumons of news from Every part of the world. Rumors of peace from Europe, large re-cripts of gold from California, no disasters within our own limits, active markets and steady prices shread for our most important staple exports, have been smoog the favorable events of the past month. Notwithstanding which, it appears impossible to give much life or energy to commercial affairs at home, and any attempt at apeculation, sinks after a spasmo die abock or two, into itactivity and depression. The banks will show a further increase in specie this

The abigments in January, 1855, so far, have been less than in the same month since 1850.

A. H. Nicolay's regular semi-weekly suction sale of stocks and bonds will take place on Monday next, the 29th inst., at 12g o'clock, at the Merchants' Ex-

Prancisco, addressed to Duncan, Sherman & Co., came in the regular mail bags, and not by private hands, as reported. Mesers, Duncan, Sherman & Co. tech them from the Post Office, notwithstanding the enders given to the Postmaster here to deliver all such letters to Heavy D. Bacon; but it was upon the such letters to Heavy D. Bacon; but it was upon the request of Mr. Bacon that such a delivery was made. Dunean, Sherman & Co. begged so hard for the privilegs of taking the letters from the Post Office that Mr. Bacon, as an act of courtesy, permitted them to do so, for this time only. The object Duncan, Sherman & Co. had in pressing the application to receive the letters so carnestly has not yet appeared. Mr. Bacon, as previously agreed upon.

The fainre of a large iron house was reported on Saturday. The suspension is attributed to the return of bills drawn on Messra. Hetherington & Co., of London, whose failure was reported by the las-

pary has been for some days steadily but quietly advancing, by the gracual absorption of the floating stock by a few of the directors and their particular friends. The P sident not deeming it prudent to longer conceal from the stockholders the important facts known to him and the directors for some days, has issued to the stocknoiders a carefully worded and non-committal circular, stating that a supposed valuable discovery had been made upon their property. We annex the circular :-

OFFICE OF THE CURRELAND COAL AND IRON COMPANY, NEW YORK, Jan. 26, 1855.

BR.—Recorts of the discovery of valuable beds of iron ore on the property of this company induced me to direct examinations to be made, the result of which thus far has been so satisfactory, and its bearing so important upon the interests of stockholders, that I deem it my duty to apprise them at once of the fact, and shall be happy to communicate to such as may favor me with a call the information I possess on the subject.

Your obedient servant, A. MEHAFFEY, President.

Why did not the President come out a week ago with a frank and full statement of what he did know and what we have since learned to be true? It is ten days since a committee of directors went to the mines with a mineralogist and an assayer of ores. They returned three or four days since. It was the duty of the President to have imparted to the stockholders all the information obtained immediately upon its receipt. A letter from the mines says that the directors admitted they had tested the ore in one vein of thirty feet, and that it was a su-perior quality, black baned ore, containing iron, lime and carbon. It was discovered by a Mr. Winter, and has created an excitement in that region greater than ever before known. The millions of dollars planted by English capitalists in furnaces and iron works in the Camberland coal district will ecme immediately into play. So easily is the ore managed, so chesply put into toe furnace, that pig metal can be placed at tide wate; for twelve dollars

The importations into this port last week were to a very limited extent, so far as the weekly custum house returns show; but our import trade has been diverted this season by the withdrawal of the Conard line, the Havre line and the Bremen line of steamers. This has given the Cunard steamers to Boston larger freights on New York account, and actually a heavier importation than our returns here show. The vaine of imports into Boston this season, compared with last, will exhibit a very great

pp. 226, on the paper, extra binding, price \$1. Every
woman can here discover, by comparing her own symptoms with those described, the nature, character and
cause of her complaint, and be spared much anxiety
and suffering. The wife about becoming a mother has
often need of instruction and advice of the utmost importance to her future health, in respect to which her
sensitiveness forbide consoiling a modelical gentleman,
will find such instruction and advice, and also explanations of many symptoms which otherwise would occasion much anxiety or alarm. How many are suffering
from obstructions or irregularities peculiar to the female
system, which undermines the health, of the effect of
which they are ignorant, and which their definesy forhide seeking medical advice. How many suffer from prolayeau uters, (falling of the womb,) or from finer alous,
(weakness, debility, &c.). How many suffer from prolayeau uters, (falling of the womb,) or from finer alous,
(weakness, debility, &c.). How many as in constant
agony for many months preceding confinement! How
many have difficult, if not dangerous deliveries, and slow
and uncertain recoveries. Some whose lives are basandof during such time will each find in its pages the means
of prevention, amelioration and relief. How many bitter
mements, how much anguish night have been spared to
the sufferer, to the husband, to the relatives, by a timeby possession of this little volumn! It is impracticable to
convey fally the various subjects treated of, as they are
of a nature strictly insended for the married or those
